

LET'S GET HEALTHY

SHOW YOUR BODY WHO'S BOSS.

Be active daily.

It's really important to be active. It can keep you healthy while lowering your risk for heart disease. And, it can be as easy as walking for 30 minutes a day. This little change will help you show your body who's boss, so it won't be showing **you** later.

Made possible with funding from the
Centers for Disease Control and Prevention.
